SPECIAL

Hanging bin Quadro

Description: Self-supporting body, with four straight sides, in the optics of four rings stacked on top of each other. Flat cover sloping towards the front, firmly connected to the body. The tilted cover results in 2 different insertion heights. Integrated ashtray with stainless still grid (stub-out surface), Separated collection of ashtray contents, detached from waste collection. A U-shaped profile on the back of the body for universal mounting on round as well as square posts.

Safety: Closure of the bottom flap by snap lock. The cover reduces the insertion height.

Handling/ Emptying: Suitable container/ bag to placed underneath the bin. The bottom flap which is fastened on one side can be opened with a key (1/4 turn). The lock is integrated in the front part of the bin for simplified access. Simultaneous emptying of the waste chamber and the ashtray is ensured.

Handling of closure/locking: Bottom flap is pushed upwards until it latches into the lock.
