## TEMPTATION Recycling bin

FFW3

Volume Compartments	60 / 60 / 60 Liter 3
Casing material	1.4301 (AISI 304) stainless steel, brushed
Casing material thickness	1,5 mm
Inner liner material	galvanized steel
	leakproof
Width	979 mm
Depth	486 mm
Height	900 mm
Weight	approx. 65,0 kg
Slot size	140 x 140 mm
Accessories / Options	see FEATURES

## TEMPTATION Recycling bin FFW3

**Description:** Self-supporting, curved fronts, straight back and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The tops funnel-shaped openings guide waste into the inner liners and are also an elementary part of the fire protection (patented and certified).

**Safety:** The galvanized inner liners are sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liners / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire. A snap lock protects the receptacle against unauthorized access.

**Handling:** Quick and easy removal of the waste bags from above. The top part of the bin automatically swivels upwards by means of a gas spring after operating the lock (1/4 turn). The contents are now visible and the waste bags can be replaced as required.
